

There are three hole diameters for our Softies. Small (SH) for a 19/20mm microphone, Medium (MH) for a 21/22 mm microphone and Large (LH) for a 24/25mm microphone. Lengths refer to the internal blind hole into which the microphone is pushed. It is important that the Softie front portion covers all the slots along the length of the microphone to ensure good windshielding. To find the appropriate Softie for your microphone please refer to our catalogue or online reference (www.rycote.com/information).

ORDER CODE	DESCRIPTION	ORDER CODE	DESCRIPTION	PRICE
SOFTIE FRONT ONLY		SOFTIE WITH MOUNT AND PISTOL GRIP (PG) HANDLE		
<i>Suitable for camera-mounted microphones, or where no additional shockmounting is required.</i>		<i>Suitable for microphones which will predominantly be hand-held, but with a 3/8" Whitworth (BSW) thread suitable for attaching to a boom pole providing shockmounting with most flexibility of use.</i>
